Beware of a Swindler!!

A fellow by the name of L. R. SWORDS, who came to this town under the pretence of opening a tailor's shop, and took board at my house, left this place on the steamboat Lala Rookh on Tuesday last, without setthing his Board bill. I give this caution to the pub-

lic to guard others against imposition from this would-be gentleman. He is a tailor by trade, about five feet ten inches high, black bair and eyes, dark complexion, thin visage, weighs about 135 pounds, wore a black cloth cap, and dressed otherwise very genteel, and not more than 21 or twenty two

The said Swords has not me out of twenty nine tolars and hity cents, for board, which is more than I can afford to lose in these hard times; and I take this mode of redress, which is the only one left me, against travelling swindlers and vagaland ras-

Hay's Liniment for Piles &c. NO FICTION.—This extraordinary chemical composition the result of science and the ination of a celebrated medical man, the introduction of which to the public was invented with the solemnity of a death-bed bequest, has since gained a reputation organicled, fully sustaining the cor-rectness of the lameuted Pr. Gridley's last confession, that " he dated not die without giving to posterity the befiefit of his knowledge on this subject, and he therefore bequeathed to his friend and attendant, Solomon Hays, the secret of his discovery.

It is now used in the principal hospitals, and the rivate practice in our country, first and most cermly for the cure of the Piles, and also so extenvely and effectually as to halfle credulity, unless where its effects are witnessed. Externally in the

Notice.

H AVING purchased of Mr. T. B. Randle, the right of Waterman & Learned's labor saving Brick Machine, I now offer to dispose of individual or county rights to soit purchasers.

This machine has been in operation the past seain, a sufficient time to test its utility as it respects its durability, and the saving of labor.

The principal advantages this machine has over all others now in use, consists in the simplicity and strength of it structure, having no complication of machinery that is liable to get out of repair, and the capadity it tempers the clay and moulds the brick, making from 60 to 80 per minute with the aid of two horses, four men, and a sufficient number of boys to bear off the brick.

Those wishing for a cheap and expeditious methd for manufacturing brick would do well to avai themselves of this opportunity.

All communications addressed to the subscriber will neet with immediate attention JAMES E. SMITH.
